

WASTE BALING PRESS

PS-30 ARTechnic Waste bin press

Application for 660/770 or 1100 L containers

Advantages of the machine:

This is a machine used to press the waste directly into standard containers with a capacity of 700 or 1100L. A properly selected 3 tons pressure provides a very high degree of compaction, not causing damage to the container. Companies using the press PS-30 reduced the export of waste by up to 75% per month. In this model, we lay emphasis on functionality, reliability and the best waste compaction results.

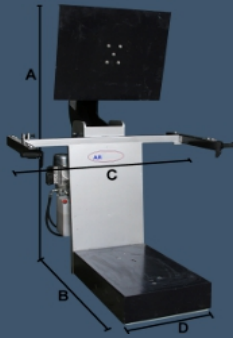

The unquestionable advantages of this device is also:

- simple operation that does not require special training
- low power consumption
- reliability
- the possibility of pressing more containers alternately
- universal power supply 230V

Technical specification

Max. pressure:	90kN (9 tons) Pressing plate pressure: 30 kN (3 tons)
Reduction size of rubbish up to:	75,00%
Application for containers:	660/770 or 1100L
Steering:	control with both hands
Supply:	230/50 (optional 400) [V/Hz]
Moc silnika:	1,5 or 2,2 [kW]

Dimension

LEGEND

A	Height	2050 mm
B	Depth	1700 mm
C	Width max.	1400 mm
D	Width min.	600 mm
